

# MOHAMED NOOR ADAN

## Frontend Developer & Full-Stack Engineer

✉ moharizein09328@gmail.com | 🌐 mohamedNoorA.github.io | 📍 Nairobi, Kenya |

Phone: +254 725 803 061

## PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with specialized expertise in React.js ecosystem and modern web technologies. Proven track record of architecting and deploying production-ready applications, including AI-powered healthcare solutions. Strong foundation in frontend development with expanding backend capabilities, demonstrated through successful deployment of complex mental health platforms and intelligent automation tools. Committed to leveraging cutting-edge technologies to solve real-world problems and enhance user experiences.

## TECHNICAL EXPERTISE

### Frontend Development

- **React.js Ecosystem:** React 18+, Hooks, Context API, Redux, React Router
- **Next.js:** SSR, SSG, API Routes, App Router, Performance Optimization
- **Core Technologies:** JavaScript ES6+, TypeScript, HTML5, CSS3, Sass/SCSS
- **Styling & UI:** Tailwind CSS, Material-UI, Responsive Design, Mobile-First Development

### Backend Development

- **Node.js:** Express.js, RESTful APIs, Middleware Architecture, Authentication
- **Database Management:** MongoDB, Mongoose ODM, Database Design, Query Optimization
- **Server Technologies:** API Development, Data Validation, Error Handling

### Development Tools & DevOps

- **Version Control:** Git, GitHub, Branch Management, Code Collaboration
- **Development Environment:** VS Code, npm/yarn, Webpack, Babel
- **Testing & Quality:** Unit Testing, Code Review, Performance Monitoring

## Emerging Technologies

- **Artificial Intelligence:** AI API Integration, Conversational AI, Machine Learning Implementation
  - **Cloud Services:** Database Hosting, Application Deployment, Performance Analytics
- 

## PROFESSIONAL PROJECTS

### MediChatAI | AI-Powered Mental Health Support Platform

#### Lead Developer | Full-Stack Web-Application

**Technologies:** Next.js, Node.js, MongoDB, Express.js, AI API Integration

**Project Overview:** Developed comprehensive mental health support platform providing AI-driven psychological assessment and therapeutic guidance through intelligent conversational interfaces.

#### Key Achievements:

- Architected full-stack application serving personalized mental health assessments to users
- Implemented secure MongoDB database schema for user profiles, conversation history, and assessment data
- Built responsive Next.js frontend with server-side rendering for optimal performance and SEO
- Developed RESTful API endpoints using Node.js/Express for seamless data management
- Integrated advanced AI models to provide contextual mental health support and crisis intervention
- Implemented real-time chat functionality with persistent conversation storage
- Designed user authentication system ensuring HIPAA-compliant data protection
- **Impact:** Created accessible mental health platform reducing barriers to psychological support

### LexAI | Intelligent Professional Document Generator

#### Frontend Developer | React.js Application

**Technologies:** React.js, JavaScript, AI Integration, Responsive Design

**Project Overview:** Developed sophisticated CV and resume building platform utilizing artificial intelligence for content optimization and professional document generation.

### Key Achievements:

- Built dynamic React application with component-based architecture and state management
  - Implemented AI-powered content suggestions improving resume effectiveness by analyzing industry standards
  - Created intuitive drag-and-drop interface for document customization and real-time preview
  - Developed responsive design ensuring cross-platform compatibility and mobile optimization
  - Integrated automated formatting system producing ATS-friendly document outputs
  - **GitHub:** <https://github.com/MohamedNoorA>
  - **Impact:** Streamlined professional document creation with AI-enhanced personalization
- 

## EDUCATION & CERTIFICATIONS

**Bachelor of Science in Information Technology** (Expected Graduation: 2025)

**Mount Kenya University (MKU) | Thika, Kenya**

*Specialization:* Software Development, Database Systems, Web Technologies, Systems Analysis

*Academic Focus:* Full-stack development methodologies, software engineering principles, database optimization

**Kenya Certificate of Secondary Education (2022)**

*Excellence in Mathematics*

---

## CORE COMPETENCIES

### Frontend Development

- React.js component development and modern hooks implementation
- Responsive web design with mobile-first approach
- JavaScript ES6+ programming and DOM manipulation
- CSS3 styling and user interface design

### Web Development Fundamentals

- HTML5 semantic markup and accessibility standards
- Cross-browser compatibility and performance optimization
- Git version control and collaborative development
- Basic database integration and API consumption

## Learning & Adaptation

- Quick adoption of new technologies and frameworks
  - Problem-solving with creative and analytical approaches
  - Self-directed learning and skill development
  - Project planning and task management
- 

## TECHNICAL ACHIEVEMENTS

- **Healthcare Technology:** Successfully deployed AI-powered mental health platform with secure data handling
  - **Performance Optimization:** Implemented Next.js applications with 95+ Google Lighthouse scores
  - **Database Management:** Designed and optimized MongoDB schemas for high-traffic applications
  - **AI Integration:** Leveraged machine learning APIs for intelligent user experiences
  - **Responsive Development:** Created mobile-first applications with cross-browser compatibility
- 

## LANGUAGES & COMMUNICATION

- **English:** Professional Fluency (Technical Communication & Documentation)
  - **Kiswahili:** Native Proficiency (Business Communication)
  - **Somali:** Native Proficiency (Community Engagement)
- 

## PROFESSIONAL INTERESTS

- **Healthcare Technology:** Developing accessible digital health solutions
  - **Artificial Intelligence:** Exploring AI applications in web development
  - **Open Source:** Contributing to community-driven development projects
  - **UI/UX Innovation:** Researching emerging design patterns and user experience trends
-
